

Sync Recovery Code

The Recovery Code allows you to sync your bookmarks across multiple devices and recover your synced data if you lose access to a device.

Keep this information safe and secure.

Anyone with access to this code can access your synced data, so please keep it in a safe place.

How does this work?

1

Open DuckDuckGo on another device and go to Sync in Settings.

2

Scan the QR code or copy and paste the text code into another DuckDuckGo app.

3

Sync will be activated and you'll once again have access to all of your data.

DuckDuckGo.
